

The Camp, Matched to the Missions

Every deliverable the camp produces, against the mission that receives it — and what to do about the four that have nowhere to go.

The camp's twenty deliverables were matched one by one to the fifteen missions and to the questions each mission actually asks. **Seven match directly** and need nothing. **Four match with a divergence** the facilitator should know about before Day 1. **Five have no mission and should** — between them they are 50% of the Bazaar rubric. The remaining four are camp-only by design and need no mission at all.

DAY	WHAT THE CAMP PRODUCES	MISSION	WHAT THAT MISSION ASKS FOR	MATCH
1	Problem cards	01 Problem Analysis	Area, the problem, who is affected, what solutions exist and their limits	Partial
1	Chosen problem on Impact x Frequency	03 Importance/Frequency Matrix	Three problems, each scored for importance and frequency	Direct
1	First persona	02 Problem Definition	Primary user, characteristics, the problem, when and where, how often	Direct
1	Team charter	—	Roles and working rules stay in the workbook	Camp only
2	Interview log	—	Feeds mission 04; no mission stores the interviews themselves	Camp only
2	Testable problem statement	04 Problem Statements	The statement, who faces it, its impact, how success is measured	Direct
2	Chosen solution, value x effort	05 Idea Selection	Three ideas, each scored for value and impact	Partial
2	Value proposition	06 Idea Description	Value proposition, 3–5 key features, benefits, differentiation, assumptions	Partial
2	Assumption test plan	07 Solution Hypothesis Test	The hypothesis, how it will be tested, what would prove it	Direct
3	Test verdict	07 Solution Hypothesis Test	Test results and what was learned — the same mission, finished	Direct
3	Simplified Business Model Canvas	08 Business Model Canvas	Value propositions, segments, channels, relationships, revenue, resources	Direct
3	One-page financial plan	none	Unit cost, price, margin and break-even have no field anywhere in the fifteen	Missing
4	Prototype	09 Build Prototype	Type of prototype, features, user flows, tools and technology used	Partial
4	User-test notes	10 Solution Hypothesis Test (Prototype)	How many tested it, how, key findings, feedback, improvements	Direct
4	Brand kit	none	Name, logo, colours and tagline have no mission	Missing

DAY	WHAT THE CAMP PRODUCES	MISSION	WHAT THAT MISSION ASKS FOR	MATCH
5	Pitch deck	none	No mission records a deck	Missing
5	Rehearsed pitch	none	No mission records the pitch itself	Missing
5	Q&A card	none	No mission records the three prepared answers	Missing
6	Public pitch	—	The Bazaar itself; judged live	Camp only
6	Booth	—	Built and judged on the day, nothing to store	Camp only

The four partial matches, and what to tell facilitators

DELIVERABLE	THE DIVERGENCE	WHAT TO SAY ON THE DAY
Problem cards → 01	Mission 01 also asks what solutions already exist and their limits. The camp does not teach competitor work.	Answer from what you already know; you will revisit it after the interviews.
Chosen solution → 05	The camp plots value × effort . Mission 05 asks for value and impact scores.	Give your value score; for impact, use how much it would help the person you interviewed.
Value proposition → 06	Mission 06 asks for 3–5 key features. Product work is Day 4.	Write what the thing would do, not how it is built. You will revise it after the prototype.
Prototype → 09	Mission 09 asks what tools and technology were used, of students building with paper and card.	Cardboard, paper and scissors is a complete answer to that question.

Closing the five that are missing

01 Add a Costs and Pricing mission after 08

Unit cost, price with its justification, margin and break-even — the exact artefacts Day 3 already produces. It also fills a hole we have outside this camp: there is no finance mission anywhere in the fifteen.

02 Add a Brand and Pitch mission after 10

Name, logo, tagline, the deck outline and the three Q&A answers — four of the five missing deliverables in one mission. Day 4 and Day 5 already produce all of it, so neither mission adds homework.

03 Adopt the pack's mission names

Seven of the ten titles in the pack are not what a student sees on screen, and the pack's are clearer — adopting them also fixes our own collision, where 07 and 10 both read as “Solution Hypothesis Test”.

Matched against the **Entrepreneurship Camp Learner Journey** pack, September 2026, and our own mission titles and question sets. The twenty deliverables are the pack's own per-day lists. The 50% is the published Bazaar weights for business and finance logic, brand and booth, pitch delivery, and Q&A. Missions 11–15 sit outside the camp and are not matched here.

StartPad is a founder-readiness platform for Egypt and MENA. It moves a young person with an idea and no company through fifteen structured missions and issues verifiable proof of the work. Nothing submitted is taken from the person who submitted it — it is sealed and timestamped to them.
